

## MH8 - KLQ6858

### HIGER SCHOOL BUS

At HIGER, we give the children priority because we know they are the future. For this reason our school buses use monocoque structure technology which provides them with stronger resistance against impacts, overturning and rolling. The driving chamber adopts a 360 degree vision design to avoid any blind spots. With G-BOS Intelligent Operation System and many other advanced electronic devices, the school bus series can protect kids and guarantee a safe ride to school.
